## MID-DUTY UTV STRAIGHT BLADE PLOW

### MAKE SHORT WORK OF SIDEWALKS & WALKWAYS.

When it's time for sidewalk clean-up duty, equip your mid-duty UTV with the WESTERN® IMPACT mid-duty UTV straight blade plow. High-strength materials and a lightweight design provide the power, speed and precision for a tailored snow removal solution for mid-duty recreational utility vehicles. The unique Sway-Frame™ design allows the blade to shift from side-to-side and aligns with the wheel track to help prevent hard-packed snow. In the middle of a storm—when your crew doesn't have time for manually angled-winch lift plows—get the performance you need with the WESTERN IMPACT mid-duty UTV plow.

MORE JOBS. **DONE FASTER.**

IMPACT™ MID-DUTY UTV  
STRAIGHT BLADE PLOW

MID-DUTY UTV APPLICATIONS.  
HEAVY-DUTY PERFORMANCE.

The WESTERN® IMPACT mid-duty straight blade plows are perfectly sized for your mid-duty UTV without sacrificing performance. The 5'6" and 6'0" widths fit sidewalks perfectly and high-strength components ensure commercial durability. Fully hydraulic blade controls allow the operator to make the necessary blade adjustments quickly from inside the cab for fast and efficient winter cleanup.

5'6"- AND 6'0"-WIDE STEEL MOLDBOARD

Constructed from high-strength, low-alloy steel components, Western Products provides better durability and performance than stamped steel or plastic products—especially when working on brutal sidewalk surfaces. To ensure maximum efficiency when cleaning sidewalks, the plows' width covers the wheel track at all times to make each pass count.

SWAY-FRAME™ DESIGN

To ensure the blade stays aligned with the wheel track, the unique Sway-Frame™ design allows the blade to shift side-to-side. This keeps the blade in the optimal position to maximize cleanup with each pass, preventing the UTV wheels from packing down missed snow.

RELIABLE HYDRAULICS\*

Full-hydraulic operation allows the operator to position the plow left, right, up, down, or float from inside the cab. This hydraulic system has been specifically designed to operate on mid-duty UTV plows, minimizing amperage draw and weight for seamless operation.

FEATURED ACCESSORIES

- Rubber Deflector
- Poly Cutting Edge
- High-Wear Cutting Edge
- Shoe Kit

DASH-MOUNTED CONTROL CONFIGURATION

HAND-HELD CONTROL CONFIGURATION

ENHANCED PLOW CONTROL

The deluxe plow control is IP66-rated against moisture and offers hand-held or dash-mounted operation for added flexibility. The weather-resistant control features large, durable switches which are easy to use—even with heavy gloves on.

LIGHTWEIGHT QUICK ATTACHMENT SYSTEM

The mounting system is easy to use and install. To make operation easier, the mounting system optimizes ground clearance when installed. Tough construction will allow it to withstand harsh conditions year-over-year.
